

Alkaline Ionized Water Testimony

I tend to be a bit set in my ways these days and I have been drinking distilled or Reverse Osmosis water as long as I can remember. I was very skeptical about any new kind of water. I have had a lot of healing experiences from divine to natural reactions to a clean vessel after years of lots of raw foods, punctuated with regular fasting over a period of nearly 40 years. I have spent much of this life understanding and seeking out the healthiest ways to live and foods to eat.

I was blown away by my experiences since I was introduced to this water.

The woman who turned me onto it was a client of mine 9 months prior and she had sever scoliosis. Her pictures are on the website as well. They are in the News letter. This lady had several treatments with me that were profound transformations of her spine. Then she was introduced to this water system and began to experience a state of well being that she had never known. Attributing here body and mind transformation to the water alone never having seen her own before and after pictures. She was enjoying the changes in her body from both the water and bodywork and yoga she did for many months.

She and I reconnected for bodywork to continue the scoliosis therapy 9 months after she began drinking this water. I was amazed that this woman my age had the texture and suppleness in her skin that was more like a person in their twenties. Her body was totally different to the feel from my last set of sessions before she began using the ionized alkaline water. I was so impressed with the changes I saw in her that I had to know more skeptical as I was having my own theories about water.

I decided to give this new water a try, and I was not disappointed. I had been exposed to a toxic environment that had made me ill 9 months prior to trying the alkaline water. I had done a 2 week fast to cleanse my system from the toxins I was exposed to 6 months prior.

I drank 2 gallons of this water and ate normally and began to smell the same toxic smell in my cloths coming out of my sweat. This amazed me. First of all that I had not gotten rid of the toxins in a two week fast six months prior astounded me. Plus that even without fasting I was detoxifying on a cellular level that told me this water is one of the most important ingredients in cleansing the system I had ever encountered.

I have never seen anything like it but understand now why it is so powerful. The acid minerals are separated from the alkaline minerals and ionized so the electrical energy one receives from raw live juice or veggies and fruit is in the essence of the water. The molecule size is smaller and so the water enters and exists the cells in a way only the water from plants dose. I then understood that I was in touch with a new tool for healing and cleansing the body that is unsurpassed in my understanding.

The scientists tell us our bodies can potentially live forever. The reason we die is due to the inability of the body to flush out the toxins in the cells and receive nutrition. If this proses of cleansing and building is perfect we would live forever potentially. So to find water that enters the cell on this level is like finding my own personal fountain of youth.

I have had a freak accident slamming a baby finger in a car door just after starting the water. The finger was 80 percent cut off and the bone broken. The

ER doctor who sewed it up said I had a 50 /50 chance of keeping it and I was sent 2 days later to a specialist. Instead of the possibility of amputation she told me I had remarkable circulation to the end and I would keep my finger and probably the nail too.

Each time I was checked out the doctors were amazed at the healing had the term amazed was used several times describing the healing process by the doctor.

I have continued to see amazing results with the water.

I recommend anyone trying to clean the body out get one of these filters. It is in my opinion one of the most important investments one can make in themselves and their families.

No matter what, from Candida overgrowth, heavy metal poisoning, or just the accumulation of toxins we face each day in our polluted environments. This is the best cure I know of. Fasting is not easy for everyone. It is wonderful that I can now direct my friends, family, and clients to a way they can cleanse without so much knowledge and needing to fast.

I am not a sales person never have been. This I consider a gift of health to all that seek it's healing potential. So no matter what the pain or illness is this can help in my opinion.

Just to caution users. There are several settings on the purifier of levels of alkalinity in the water produced. The best thing to do with cleansing is to take it slow. Start out with part just purified water, and part low level of alkalinity water, and work up to higher settings. If you get a headache or the runs or other detoxification symptom cut the alkaline setting back till you are ready for the next level. In my years fasting and doing cleansing diets and Candida cleanses I have learned that going too fast is not good. Slow and steady is much easier on the system with better results.

So have a look at the purifier on the link here and join me in a pursuit of life long health and wellbeing. To your health, Cheers
